EDUCATION

Institute of Aeronautical Engineering, Hyderabad, India *April 2026*
B.Tech in Computer Science and Engineering (Data Science) GPA: 8.07/10

J N Govt. Polytechnic, Hyderabad Apr 2023
Diploma in Electrical and Electronics Engineering GPA: 8.41/10

Krishnaveni High School, Peddapalli March 2020
SSC GPA: 10.0/10

TECHNICAL SKILLS

Programming: Python, SQL
Data Analytics: Power BI, Power Query, DAX, Pandas, NumPy
Machine Learning: Scikit-learn, Classification, Regression, Clustering, Feature Engineering, Model Evaluation
Deep Learning: TensorFlow, PyTorch, Neural Networks, Transfer Learning
Backend & Deployment: Flask, FastAPI, REST APIs, Docker, AWS
Tools: Git, Jupyter Notebook

WORK EXPERIENCE

Makri Solutions Private Limited, Hyderabad May – June 2024
Data Analysis Intern – GitHub

- Analyzed Annual Health Survey (AHS) data covering **21M+ individuals** and **4.32M+ households** across **9 North Indian states** through data acquisition, preprocessing, transformation, and exploratory data analysis.
- Built interactive healthcare dashboards to analyze IMR, MMR, TFR, fertility, institutional deliveries, and demographic indicators for district-level healthcare insights.
- Improved reporting reliability by validating datasets, developing data models, and delivering accurate KPI-driven healthcare reports.

Tech Stack: Python, Pandas, NumPy, Matplotlib, Seaborn, Plotly, Power BI, Power Query, DAX, Excel, Jupyter Notebook

PROJECTS

MLOps Movie Recommendation System (GitHub) Dec 2025 – Jan 2026

- Built a movie recommendation system where users enter a movie title and receive similar movie recommendations based on genres, cast, keywords, director, and plot descriptions.
- Implemented a recommendation pipeline that matches the user-selected movie, converts movie metadata into TF-IDF embeddings, computes cosine similarity scores, and returns the most relevant movies.
- Deployed the application using Flask, Docker, AWS S3, and REST APIs for scalable recommendation serving and model artifact management.

Tech Stack: Python, Scikit-learn, TF-IDF Embeddings, Cosine Similarity, Flask, MongoDB, AWS S3, Docker, REST APIs

Brain Tumor Classification (GitHub) Jan 2026 – Feb 2026

- Developed a brain MRI classification system using a dataset of **7,000+ MRI images** across four classes (Glioma, Meningioma, Pituitary, and No Tumor), where users upload MRI scans for automated diagnosis using a fine-tuned **EfficientNet-B2** model with **Transfer Learning**.
- Implemented an inference pipeline using **TensorFlow** to preprocess MRI images, perform real-time classification, generate diagnostic confidence scores, and automatically produce structured PDF medical reports with disease information and healthy MRI reference comparisons.
- Deployed the application as an interactive **Flask** web application with responsive HTML,CSS,JavaScript interfaces for MRI upload, prediction serving, and report generation, achieving **98% test accuracy**.

Tech Stack:
Python, TensorFlow, Keras, Flask, ReportLab, Bootstrap, HTML, CSS, JavaScript, NumPy, JSON

CERTIFICATIONS

GenAI Powered Data Analytics Job Simulation – Forage July 2025
LLM Engineering: Master AI, Large Language Models & Agents – Udemy Apr - May 2025

E-PORTFOLIOS

- **Portfolio: https://dandu-yeshwanth1809-portfolio.vercel.app/** — Projects, skills, and technical challenges.
- **GitHub: github.com/YeshwanthDandu180903** — Code repositories showcasing machine learning, deep learning, and deployment projects.
