EDUCATION

Institute of Aeronautical Engineering, Hyderabad, India — *April 2026*
B.Tech in Computer Science and Engineering (Data Science) — GPA: 8.07/10

J N Govt. Polytechnic, Hyderabad — Apr 2023
Diploma in Electrical and Electronics Engineering — GPA: 8.41/10

Krishnaveni High School, Peddapalli — March 2020
SSC — GPA: 10.0/10

TECHNICAL SKILLS

Programming: Python, SQL
Machine Learning: Scikit-learn, TensorFlow, Keras, Pandas, NumPy
Data Analysis & Visualization: Power BI, Tableau, Excel
Data Engineering: ETL Pipelines, Data Cleaning, Feature Engineering
Tools: Git, Jupyter Notebook, VS Code

WORK EXPERIENCE

Makri Solutions Private Limited, Hyderabad — May – June 2024

Data Analysis Intern – GitHub

- Analyzed Annual Health Survey (AHS) data covering **21M+ individuals** and **4.32M+ households** across **9 North Indian states** through data acquisition, preprocessing, transformation, and exploratory data analysis.
- Built interactive healthcare dashboards to analyze IMR, MMR, TFR, fertility, institutional deliveries, and demographic indicators for district-level healthcare insights.
- Improved reporting reliability by validating datasets, developing data models, and delivering accurate KPI-driven healthcare reports.

Tech Stack: Python, Pandas, NumPy, Matplotlib, Seaborn, Plotly, Power BI, Power Query, DAX, Excel, Jupyter Notebook

PROJECTS

Customer Churn Prediction (SQL & Power BI) (GitHub) — Oct 2025 – Nov 2025

- Built an end-to-end customer churn prediction pipeline by transforming raw telecom data in **SQL Server**, performing ETL, data cleaning, feature engineering, and exporting analytics-ready datasets for machine learning.
- Developed a machine learning pipeline in **Python** using **StandardScaler**, One-Hot Encoding, **GridSearchCV**, and **5-fold Cross Validation** to evaluate Logistic Regression, KNN, Decision Tree, AdaBoost, Naive Bayes, and Random Forest models, achieving **93.58% test accuracy**.
- Deployed prediction outputs and churn probability scores into an interactive **Power BI** dashboard with KPI scorecards, customer segmentation, and drill-down reports for business-driven retention analysis.

Tech Stack: Python, SQL Server, Scikit-learn, Pandas, NumPy, Power BI, Jupyter Notebook, Pickle

MLOps Movie Recommendation System (GitHub) — Dec 2025 – Jan 2026

- Built a movie recommendation system where users enter a movie title and receive similar movie recommendations based on genres, cast, keywords, director, and plot descriptions.
- Implemented a recommendation pipeline that matches the user-selected movie, converts movie metadata into TF-IDF embeddings, computes cosine similarity scores, and returns the most relevant movies.
- Deployed the application using Flask, Docker, AWS S3, and REST APIs for scalable recommendation serving and model artifact management.

Tech Stack: Python, Scikit-learn, TF-IDF Embeddings, Cosine Similarity, Flask, MongoDB, AWS S3, Docker, REST APIs

CERTIFICATIONS

GenAI Powered Data Analytics Job Simulation – Forage — July 2025
LLM Engineering: Master AI, Large Language Models & Agents – Udemy — Apr - May 2025

E-PORTFOLIOS

- **Portfolio: https://dandu-yeshwanth1809-portfolio.vercel.app/** — Projects, skills, and technical challenges.
- **GitHub: github.com/YeshwanthDandu180903 —** Code repositories showcasing machine learning, deep learning, and deployment projects.
